Youth Producer Health Record Instructions

Goal: These records should reflect ALL treatment and care given while the animal is under YOUR care, including all animal health products and medicated feeds used.

DO NOT include health products administered by the breeder or seller of the animal; this information should be kept separate in your records. As the youth producer, the youth raising, showing and marketing the animal, you will sign this form to verify the health products administered to the animal while in YOUR care.

Market Lamb Health Record

Step 1:
Obtain an Animal Health Record for your animal prior to purchase and complete the "Youth Producer" information box.

Step 4:
This step is to be kept up-to-date throughout the care and ownership of your animal when using ANY animal health-care products.

WITHDRAWAL TIME: is the amount of time from the last treatment until the animal can be marketed. It is found under the "warning section" of the label.

Step 5:
Record any feeds that contain medications and their withdrawal time from last feeding. Do not use any feed that is not specifically formulated for the specific species you are feeding.

Step 2:
Obtain breeder information. Be sure to include the date you purchased your project animal. Some breeders are involved in quality assurance programs. If so, include relevant information.

Step 3:
Obtain animal information from the breeder, such as identification number, breed, date of birth, etc. Be sure to leave enough space on the identification line for show number if tagged during show.

For Lambs: All females must be tagged with state or federally approved scrapie tag. If the breeder knows sire's callipyge gene status, include that information.

Step 6:
Youth and their parent or guardian will complete the certification box when they transfer the animal to the fair or show.

Youth Producer:

Cooperative Extension programs and employment are available in all without discrimination. Evidence of discrimination may be reported through your local Cooperative Extension Office.

VERY IMPORTANT--It is against federal regulations to feed prohibited mammalian protein, such as ruminant meat and bone, to ruminant animals (cattle, sheep, or goats).

NOTE: Many fairs and packing plants are requiring youth to verify health-product and feed compliance. You may not be able to sell project animals at the fair or livestock show if you do not accurately complete the project animal health record. Animals are randomly tested for potential violations that may result in a monetary fine and/or criminal prosecution. Keep a copy of the health record for at least six (6) months after sale, and preferably a year.
