

Getting Started with Digital Mapping Apps

Classroom lecture with outdoor practice sessions

Get the most out of digital mapping apps on your smart phone or tablet. We will cover commonly available digital mapping applications and how to integrate them into daily management activities. Use your smart phone or tablet to calculate acres or distances of property features, follow up on road problems, insect damage, invasive plants and more!

Wear sturdy walking shoes and bring a sun hat. The outdoor practice sessions will be walking distance from the classroom. Participants are encouraged to bring their own laptop computer and smart phone or tablet.

Choose between the Myrtle Point or Gold Beach locations for this afternoon workshop.

\$10 per person or \$15 for two people sharing materials.

Friday, August 9th, 2024 from 1pm- 4pm. Coos County Extension Office, Myrtle Point: 631 Alder St. Myrtle Point, OR 97458. Register for the Myrtle Point workshop by August 5th. Register here: <https://beav.es/cyu> →
